ABOUT ME

I finished my bachelor's in engineering computer systems with a specialty in software development.

Though I really enjoy working on frontend development, I also have backend knowledge.

In my free time, I spend a great part of it learning about web development with the hope that in the future I can change the way everyone produces content for the internet.

WORK EXPERIENCE

IBM - Marketing Services Center
Web designer

Role dedicated to creating and maintaining all IBM public pages taking care of the highest standards of quality and accessibility.

IBM - Marketing Services Center
Technical Leader / Latinoamerica team

I was the technical leader of a Brasilian team with approximately 12 web designers; some of my responsibilities were, writing documentation, supporting the team, solving technical questions related to our CMS, our CSS framework, accessibility, access, sizings, etc.

IBM - Marketing Services Center
Lead developer / Innovation team

This team has a platform to submit innovative ideas, once they are evaluated and approved they are reassigned to the development team. Some of my responsibilities were, deciding stacks to use, developing some of these applications, or just supporting them.

IBM - México Software Lab
Fullstack developer / Drupal team

The Drupal team's main objective is to change the way all IBM pages are created and controlled, such as ibm.com, ibm.com/watson, cloud, etc. We are working with a WYSIWYG solution that will dramatically reduce development times. Every day the Drupal instance with which we work at IBM has become more robust. Currently, we work multiple modules with a Microfrontends architecture operating between each other.

SKILLS

Note: These charts reflect just how comfortable I am with these technologies.

HTML5
Semantic tags, accessibility, SEO basics, APIs

CSS3
Flexbox, grid, preprocessors, methodologies, grid systems, CSS in JS

JS
ES6, DOM manipulation, fetch, package managers, task runners

Version control system
Git, Github

Module bundlers
Webpack, Parcel

JS Frameworks
Vue.js, React, Angular.js, Angular, Gatsby, Next

CMS
Wordpress, Drupal

Testing
Unit testing, E2E testing

DBMS
MySQL, Mongo

Backend
PHP, Java, Nodejs, Express, APIs, JWT

EDUCATION

ITSU
Bachelor's degree

CISCO
CNNA1 Certification

CENTRAAL
Mobile web specialist

ORACLE
Java SE6 Certification

HACKATHONS

TALENT LAND
Mercado pago challenge

GOOGLE
Polython challenge

IBM
Apache Beam challenge
